

I am in support of State Bill 418. As a 58 year old woman newly diagnosed with Primary MS I have had to go through the process of fighting with my insurance company to agree to pay for the medication that my Yale neurologist thought would be best for me. This medication would be used off-label. After 3 appeals, the insurance company finally agreed. I have since received 3 doses and it appears that my MS has not progressed. There are others in my support group who have not been as fortunate.

Please support the bill.

Thank You,

Susan A. Sawula
